Ultimo PRO Subwoofer Series

The Legacy of Precision and Musicality in Bass

The Ultimo Pro continues the legacy of Morel's renowned Ultimo subwoofers, once again setting a new standard for car audio bass reproduction. This latest generation is true audiophile lover's dream, delivering controlled, musical bass with minimal distortion and extraordinary output, making it the ultimate choice for those who demand excellence.

Developed with an entirely new perspective, the Ultimo Pro mirrors the precision of its predecessor while improving the dynamics and output with a 35% increase in excursion. This is due to the more powerful motor and newly engineered suspension system that enhances its linearity and control, providing superior responsiveness at any volume level.

Designed for use in both sealed and ported enclosures, the Ultimo Pro offers powerful, accurate bass with tight control—ensuring that low frequencies are reproduced with exceptional detail and musicality.

Key advantages

- Massive 5.1" External Voice Coil (EVC) featuring dual 4 ohm windings
- High excursion, high power handling design for exceptional output
- Copper sleeve and powerful motor provide ultra-high resolution performance
- All new carbon fiber/cellular fiber sandwich cone provides 200% better rigidity and superior damping, providing unbelievable accuracy and detail at all volumes
- PFST™ - Progression Field Symmetry for longer linear excursion and optimized performance at high output levels.
- Field serviceable design
- Engineered for optimal performance in both compact sealed and vented enclosures

Specifications	Unit size (inch)	Nominal impedance (Ohm)	Power Handling (WRMS)	Peak Power Handling (W)	Sensitivity (2.83V/1M) (DB)	Frequency Response (Hz)
Ultimo Pro 104D	10" diameter	Dual 4Ω	900	2500	83 (2Ω)	10-500
Ultimo Pro 124D	12" diameter	Dual 4Ω	1000	3000	83.7 (2Ω)	10-500
